

# ***THD* Digital Mobile**

**Portable diagnostic revolution**

# Beyond vision

## Portable proctology clinic?

**YES**

In an increasingly dynamic world, discover the future of diagnostic examinations with THD Digital Mobile, **the complete portable proctology clinic**.

All the diagnostic tools at your fingertips, wherever you are, with the convenience of a cutting-edge, easily transportable system.

## Does it revolutionise your work?

**YES**

The digital revolution in your work:  
**perform better, quicker and in a documented manner.**

Increases your diagnostic capacity,  
without disrupting your habits.

Creates a structure to preserve,  
analyse and share the patient's  
medical history.

Improves your experience and  
broadens your perspectives.

## Reliable and certified?

**YES**

Choosing a reliable tool is essential to add more  
value to your work.

A **medical software** application specifically  
designed and certified by a European notified body,  
it's the choice that puts your diagnostic assessments  
in safe hands, safeguarding you and the patient.

# Digital video anoscopy

## Ultra compact video camera

Compact, lightweight, technologically advanced and complete with lighting system. THD Digital MiniCam projects you into the world of **digital videoanoscopies**, without trade-offs. The digital future of proctology diagnostics at your fingertips.

## Patented anosscopes

Dedicated anosscopes to make your work easier and quicker. The THD N-Ano Digital family of anosscopes amplifies your visual capacity, increases your comfort and expands your diagnostic effectiveness thanks to its **patented innovations**.

## Control pedal

Freedom of action by interacting with the software via Bluetooth and excellent ergonomics for your diagnostics. **Freedom of movement and control**, wireless, without trade-offs.

## Certified software

All diagnostic procedures in a single visit thanks to **the only certified medical modular suite**.

## Real-time acquisition

Support your work by recording **real-time images and videos**, making your diagnostic choice objective.

## Patient test archive

Your **patients' medical histories** are collected and archived in a **single database**, allowing you to study their evolution over time.

# Endoanal ultrasound

## 360° rotating ultrasound probe

Easy-to-move **ultrasound probe** allowing a **detailed analysis** with the acquisition of photos and videos of the anatomical structures involved.

## USB port

The USB port allows for convenient, **quick and easy use** of the THD EAUS Probe in **multiple scenarios**, from the clinic to the patient's bed.

## Quick and minimally invasive exam

Accurate diagnostics in **little time**, guarantees **comfort and safety** thanks to its atraumatic and innovative design.

## Ergonomic handle

Its **handy design**, with a practical activation button integrated into the handle, **facilitates movements** during all phases of the exam.

# Anorectal manometry

## Self-calibrating disposable probes

Innovative, **ready-to-use probes** without the need for calibration, allowing **precise and continuous pressure measurement** along the entire anal canal.

## Compact and portable device

Lightweight, small in size and **easily transportable** for **immediate use** and a quick and precise diagnosis wherever you are.

## Precise, standardised exam

**Standardised and replicable values**, not influenced by the operator and the instrument, for **reliable and comparable results** at every stage of the exam.

## Direct interpretation of data

Numerical and graphical display of results in real time to allow **immediate evaluation of the data** and an **extremely intuitive functional diagnosis**.
