

THD SLIDE ENV

THD SUTURE	THD SLIDE ENV	THD DOPPLER PROBE
		

Use

THD Slide Kit provides all instruments needed to perform the THD procedure; treatment of varying grades of haemorrhoidal disease.

General description

THD Slide is specifically designed for immediate use with the THD Revolution doppler dearterialiser. THD Slide anoscope/proctoscope is specifically designed for improving the THD procedure while treating the higher grades of the haemorrhoidal disease. The specific shape of the anoscope/proctoscope, which includes a port for the THD Doppler Probe, allows ligation and prolapse reduction with a single tool and reduces procedure time. The THD Slide anoscope/proctoscope is made of clear, medical grade, plastic which creates, in tandem with the use of the fibre optic tip, ideal lightning of the operative field. The THD Slide anoscope/proctoscope is designed to maintain the correct tension of the anal cavity during the procedure and presents placement for the THD needle holder. The supplied doppler probe lodges into the anoscope/proctoscope and is thereby positioned with the anal mucosa for an accurate detection of the haemorrhoidal arteries. The box also contains 1 re-usable, 10 shots, Doppler probes, 10 sutures packs with 6 sutures each and 1 THD needle holder re-usable.
